

SQL Assignment 3

Table: Employee (EID, Ename, Department, Salary)

1. Write a query to display each Department and the total number of employees working in that department from the Employee table.
2. Write a query to find the Department, the highest salary (MAX), and the average salary (AVG) for each department.
3. Write a query to count how many employees are in each Department.
4. Write a query to find the minimum salary in each Department
5. Write a query to show departments that have more than 2 employees
6. Write a query to show departments where the total salary payout is greater than 100,000
7. Write a query to find departments where the average salary is above 60,000
8. Write a query to show departments that have exactly 1 employee
9. Write a query to list all employees sorted by Salary from highest to lowest
10. Write a query to list all employees sorted by Ename in alphabetical order
11. Write a query to list all employees sorted by Department alphabetically, and then by Ename alphabetically.
